

LOCKOUT TAGOUT (LOTO)

Enclosed Space Entry (ESE) Package

Aligned with IMO guidance, including
MSC.581(110)

The **Lockout-Tagout (LOTO) Enclosed Space Entry (ESE) Package** is designed to ensure the safe isolation and clear identification of hazardous energy sources before maintenance, repair, or inspection activities are carried out in enclosed spaces.

It provides a structured method for isolating electrical, mechanical, pneumatic, and fluid energy sources, eliminating the risk of unintended activation or pressurization of equipment.

By controlling these hazards, the package helps establish safe working conditions for personnel entering enclosed or restricted areas onboard vessels, such as tanks, cargo holds, and void spaces.

Package Contents

Lockout & Control

- > 1 x Lockout Tool Box
- > 6 x Safety Padlocks
- > 8 x Lockout Hasps

Valve / Fluid / Pneumatic Isolation

- > 1 × Ball Valve Lockout
- > 1 × Adjustable Valve Lockout
- > 1 × Cable Lockout
- > 1 × Air Source Lockout

Identification & Accessories

- > 20 × Lockout Tags
- > 20 × Ties Set
- > 1 × Pen
- > 1 x Red and White Hazard Tape

Electrical Lockouts

- > 12 x Circuit Breaker Lockouts
- > 2 x Electrical Plug Lockouts
- Documentation
- > LOTO Procedure (included)

You May Also Need:

LOTO ESE package can be combined with portable gas detectors and enclosed space entry and rescue equipment, such as tripods, fall arrest and retrieval devices and safety harnesses, to form a complete enclosed space safety solution, depending on vessel requirements.
